

SC ruling vindicates Romualdez, says mayor

By Joy A. Soliman
PHILIPPINE DAILY INQUIRER

MANILA (PDI) — Mayor Isko Moreno (PDP-Laban) has said that the Supreme Court's ruling in favor of his administration is a vindication of his leadership and the integrity of his administration.

Moreno said the ruling is a vindication of his leadership and the integrity of his administration. He said the ruling is a vindication of his leadership and the integrity of his administration.

Moreno said the ruling is a vindication of his leadership and the integrity of his administration. He said the ruling is a vindication of his leadership and the integrity of his administration.

BIR P3B short of 6-month target

By Conrado B. Salinas

THE BUREAU OF INTERNAL REVENUE (BIR) is short of its six-month target of P100 billion in P3B collections. The BIR is currently at P85 billion, or 85 percent of its target. The BIR is currently at P85 billion, or 85 percent of its target. The BIR is currently at P85 billion, or 85 percent of its target.

The BIR is currently at P85 billion, or 85 percent of its target. The BIR is currently at P85 billion, or 85 percent of its target. The BIR is currently at P85 billion, or 85 percent of its target.

An Appeal to the DOE and oil companies: GREATER TRANSPARENCY REQUIRED ON OIL PRICING.

World oil prices are soaring due to the escalating conflicts in the Middle East and Africa. And with the announcement of the oil companies that there will be another oil price hike within 30 months, a question for consumers here like is inevitable.

Consumer & Oil Price Watch (COPW) believes that in this time of volatile oil prices, there is an URGENT need for greater TRANSPARENCY on the part of oil companies and the DOE.

As stated by Section 1409 of the Oil Conservation Law (PL 247), oil companies must extend, under OIL, the basis of any oil price change 12 hours before any adjustment of price change. This means that oil companies must extend 12 hours before any adjustment of price change. This means that oil companies must extend 12 hours before any adjustment of price change.

TO PROTECT THE CONSUMING PUBLIC,

COPW strongly urges the DOE to REACTIVATE the Joint Task Force to enforce these IMPORTANT PROVISIONS of the Oil Conservation Law.

COPW also appeals to the government, the transport sector and the private sector to work closely to prevent a problem for a managed fuel increase.

COPW (Consumer & Oil Price Watch) has met with Presidential Management Staff & their Regional and Local Offices to discuss the need for the COPW government agencies (DOE, DOT, DILG, DOH, and others) to be proactive and work as a team to enforce transparency. That will avoid a fuel price hike.

COPW RECOMMENDS THE FOLLOWING MEASURES:

1. Remove the 2% tariff on imported crude and petroleum products by **mid-July** for the month of August 5, September as an incentive to the Middle East crisis. The price of oil should be no higher than a 1% to 1.5% per barrel. In the other hand the OPEC crude oil price should be no higher than 100% and used by Petro and Shell Oil Refineries is 5.40 per barrel.
2. Cancel out and Auto engines from gasoline to liquidated Petroleum Gas **ONLY** for the transport sector. Since OPEC is 10% cheaper than gasoline, the government will have a positive impact on the economy.
3. A PIS subsidy is provided that PIS subsidy used by businesses to transport is decreased from 10% to 5%. COPW will continue to work with the DOE, DOT and the NTC on how we can quantify the savings and prevent returns.
4. For NEW Private to motor fuel, there will provide from an address. Private and Shell as their cost is substantially lower than the **DOCS** (Ministry of Prices Singapore) import pricing which today is 100% for some for unleaded gasoline and 50% for DIESEL.

The escalating price of oil is a global problem. One that is not political in nature.

We urge our leaders in government to unite, and work hand-in-hand with the oil companies and the transport sector in order to ease this burden on the consuming public.

STORM HENRY IN C LUZON

3 die; 111 villages under water

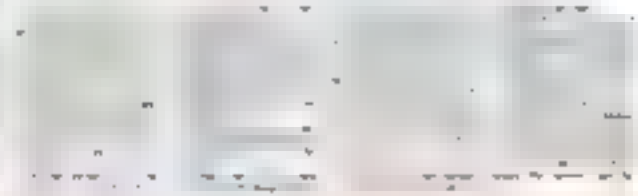

By James S. Buchanan
PH

MANILA, April 10 (AP) — A powerful storm, known as Henry in the Philippines, hit Luzon today, killing three people and leaving 111 villages under water. The storm, which originated in the western Pacific, moved eastward and struck the northern coast of Luzon. It brought heavy rain, strong winds, and a large surge of water. The surge inundated many coastal villages, cutting off communication and isolating many communities. The Philippine government has issued a state of emergency for the affected areas and has ordered the military to assist in rescue operations. The storm is expected to continue to move eastward, with the potential to affect other parts of the Philippines and the surrounding region.

Carabaos find new use in village waste collection

By Charles F. Haddock
PH

Carabaos, or water buffaloes, are being used in a new way in a village in the Philippines. The villagers have discovered that the animals are well-suited for pulling carts loaded with waste. This method is a cost-effective and sustainable way to manage village waste. The carabaos are trained to pull the carts, and the waste is then taken to a central collection point. This initiative is part of a larger effort to improve waste management in rural areas and reduce the environmental impact of village waste.

The use of carabaos for waste collection is a traditional practice in some parts of the Philippines. However, this new application shows the versatility of these animals. The villagers report that the carabaos are easy to train and maintain, and they are well-suited for the local climate. This method has been successful in several villages, and it is being推广 to other areas. The initiative is supported by local government officials and international organizations. It is hoped that this method will be adopted widely, leading to improved waste management and a cleaner environment in rural areas.

[illegible]

Perhaps the reason
 for this is that the
 company is not
 aware of the
 fact that the
 public is not
 likely to be
 interested in
 the company's
 activities.

Figure 10 shows the results of the analysis of variance for the effect of the different factors on the response of the different groups of subjects. The results show that the effect of the different factors is significant for the different groups of subjects. The results also show that the effect of the different factors is significant for the different groups of subjects.

The diagram illustrates the experimental setup. A subject is seated at a table, looking at a video screen. A video camera is positioned above the screen to record the subject's behavior. A light source is positioned to the left of the screen to illuminate the scene. The subject is viewing a video screen that displays the visual feedback of their actions. The video camera is positioned above the screen to capture the subject's movements. The light source is positioned to the left of the screen to provide illumination for the video recording.

These results demonstrate that

The diagram illustrates the experimental setup. A participant is seated at a table, looking at a video screen. On the screen, there is a starting point (a large circle) and a target (a small circle). The distance between them is labeled 'Distance'. The participant's hand is at the starting point and is labeled 'Hand'.

SPMA raised for national gov't
P2.2 billion in tax revenue

By David B. Santiago

Subic Bay Freeport Zone (SBFZ) is expected to remain the top investment site in the Philippines in 2006, according to a report by the Subic Bay Metropolitan Authority (SBMA). The report, titled "Subic Bay Freeport Zone Investment Attractiveness Study," was released last week. It ranked SBFZ as the most attractive investment site in the country, followed by Cebu, Manila, and Iloilo. The report also noted that SBFZ has a strong infrastructure base, a skilled workforce, and a favorable tax environment. It also mentioned that SBFZ has a long history of successful investments, particularly in the manufacturing and services sectors. The report further stated that SBFZ has a high potential for growth and development, and it is expected to continue to attract investments in the coming years.

3,780 reasons to turn slumping auto parts industry around

By Brock Adams

THE AUTO PARTS INDUSTRY IS SLUMPING. It's not just the car market that's down, but the parts market is also down. The industry is facing a crisis of confidence, and it's time to turn it around.

The industry is facing a crisis of confidence, and it's time to turn it around. The industry is facing a crisis of confidence, and it's time to turn it around.

Healthy competition

Healthy competition is a key factor in the auto parts industry. It's not just the car market that's down, but the parts market is also down. The industry is facing a crisis of confidence, and it's time to turn it around.

Improved parts market

Improved parts market is a key factor in the auto parts industry. It's not just the car market that's down, but the parts market is also down. The industry is facing a crisis of confidence, and it's time to turn it around.

O-rings and preventive maintenance

On the Road

Castrol

Service centers

O-rings

O-rings are small, donut-shaped seals that prevent leaks of oil, coolant, and other fluids from an engine. They are made of a soft, pliable material, usually rubber or plastic, and are designed to fit snugly against the surfaces they are sealing.

Over time, O-rings can wear out or become damaged, leading to leaks. This can cause engine problems, such as low oil levels, overheating, and even engine failure. It is important to check O-rings regularly and replace them if they are worn or damaged.

Preventive maintenance

Preventive maintenance is a series of routine checks and services that help keep a car running smoothly and prevent major problems. It includes things like oil changes, tire rotations, and brake inspections.

By following a preventive maintenance schedule, you can extend the life of your car and avoid costly repairs. It is a good idea to have a professional mechanic perform these services regularly.

Rufa Mae sure Erik's not gay

By Max Vento

MANILA—Rufa Mae Aquino, 34, is sure Erik is not gay. She says she is not gay either. She is a 34-year-old actress and model who has been in the industry for 15 years. She is currently in a relationship with Erik, a 32-year-old actor and model. She says they have been together for about a year. She says they are not gay. She says they are just two people who love each other. She says they are not gay. She says they are just two people who love each other.

M apologizes to movie-TV board

By Max Vento

MANILA—Movie and TV industry leaders have apologized to the Movie and Television Review and Classification Board (MTRCB) for a recent incident. The MTRCB is a government agency that regulates the content of movies and television programs. It has the authority to rate movies and TV shows, and to ban or restrict certain content. The industry leaders, including movie producers and TV network executives, have expressed their regret and apologized to the board for any inconvenience caused. They have also promised to take steps to ensure that such incidents do not happen again.

■ **THE NEW** *Journal of Management Inquiry* is a peer-reviewed journal that will cover a wide range of topics in the field of management and organization. The journal is published quarterly and is available online.

After the discussion in January, it proved an easy and uncontentious decision to grant a new five-year licence.

Next, let's consider a few common strategies. Both of Google's Gmail and its AdSense ad servers use built-in client-side JavaScript to determine a user's location. In Google's AdSense implementation, the JavaScript code is loaded from a remote server and then runs on the user's browser. In Google's Gmail implementation, the JavaScript code is loaded from a remote server and then runs on the user's browser. Both of these implementations use the JavaScript code to determine the user's location. In the Gmail implementation, the JavaScript code is loaded from a remote server and then runs on the user's browser. In the AdSense implementation, the JavaScript code is loaded from a remote server and then runs on the user's browser. Both of these implementations use the JavaScript code to determine the user's location.
